

Athera FingerPrint Track and Trace

Comprehensive traceability
and inventory management

End-to-end visibility of your surgical instruments, equipment, and implants

With FingerPrint you can:

**Prevent the risk of
infection with detailed
sterilisation records**

**Increase operational
efficiency with unified,
actionable data**

**Reduce
incidents / claims and
related costs**

**Minimise costs
and wastage
of inventory**

**Build patient
trust and service
reputation**

**Ensure
regulatory
compliance**

How Athera Fingerprint works

FingerPrint delivers detailed traceability on individual equipment throughout its lifecycle.

- + **Current location and condition**
- + **Expiry dates - with tailored automated alerts**
- + **Usage history and impending destinations**
- + **Decontamination history**
- + **Log of responsible individuals**
- + **Overall stock levels**

Athera FingerPrint in Practice

“

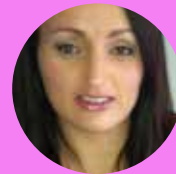

We haven't had a surgery cancellation due to inefficiencies for 3/4 years now...thanks to process improvements built from **FingerPrint's** tech. ”

Athera Fingerprint Customer

“

I've used many traceability systems in the past and **FingerPrint** is by far the most user-friendly system – it's so simple and easy to update, scan barcodes and see what's going on across the full cycle. ”

Tracey Scott, CSSD Manager, Dublin Dental University Hospital

“

FingerPrint is a lot more 'colourful' than other solutions. It has more functionality which has had a massive impact on efficiency. ”

Athera Fingerprint Customer

“

Traceability is integral to our business. ”

Athera Fingerprint Customer

The Athera Healthcare Difference

Our Approach

We take a partnership approach - understanding our customers' unique needs and challenges and collaborating to create a robust, tailored solution with lasting impact.

Our Vision

We aim to set the standards of traceability in clinical practice. We want to share that vision and determination by working with you - to drive progress, together.

Our Focus

Our detailed reporting systems go far beyond a single tray. We focus on the bigger picture, to deliver intelligence-driven platform integrations for the future.

Empowering healthcare organisations to drive progress, improve operational efficiency & enhance patient care

We are the national traceability supplier for the Health Service Executive (HSE) in Ireland and have enhanced communication and coordination across the entire organisation - in a partnership that extends over 15 years - as well as with various public and private entities across the UK.

We're dedicated to supporting healthcare organisations, with **comprehensive traceability and reliable inventory management.**

Our Partnership Approach

We develop lasting and trusted relationships with our customers, combining our shared wealth of knowledge and experience with innovative technology, with your specific goals to propel progress and success within your healthcare teams.

You drive the change, we empower you to do so.

Who we help

We collaborate with our customers to understand their specific requirements and deliver tailored digital solutions that support the complex challenges they face.

Our solutions have benefitted:

- + **Dental Hospitals**
- + **Theatres**
- + **Clinical Auditing Teams**
- + **Research Units**
- + **Universities**
- + **Integrated Care Boards (ICBs)**
- + **Hospitals**
- + **Royal Colleges**
